

# Ageless Artificial Soil

Reusable, Corrosion Free Soil  
Dramatically Changes Your Farming Experience

**From Professionals to Gardening Beginners**  
**High Fertilizer Effectiveness & Control**

- Made-in-Japan Cultivation Medium
- Material: Recycled polyester, Artificial Zeolite
- Extremely Light, Non-organic, Corrosion-Free, High Drainage, Reusable, Insect-Proof and more

## Grows Healthily on Thinner Layer

[Step 1] Spread Ageless Artificial Soil  
[Step 2] Press to Consolidate

**About 3~6 Times Thinner !**

| Kind   | Necessary Height if Done by General Soil | Initial Height | Height After Consolidation |
|--|--|----------------|----------------------------|
| Peas, corn, cabbage, Japanese mustard spinach, eggplants, cucumbers, green pepper, Chinese cabbage | 300~450 mm                               | 90-100 mm      | <b>70 mm</b>               |
| Parsleys, green spring onions  | 150~200 mm                               | 65-70 mm       | <b>50 mm</b>               |
| Root vegetables (potatoes, sweet potatoes, onions, carrots)  | Dependent on fruit size                  |                |                            |

### [ Data Comparison ]

|                               |                      | Conventional Soil | Ageless Artificial Soil |
|-------------------------------|----------------------|-------------------|-------------------------|
| Weight                        |                      | 40L 48kg (Dry)    | 40L <b>5kg</b> (Dry)    |
| pH (approx)                   | Start                | pH 7.0            | <b>pH 7.1</b>           |
|                               | After 3 Years of Use | pH 4.0-5.0        | <b>pH 5.5~6.5</b>       |
| CEC (Cation Exchange Quality) |                      | 10 ~ 15 cmol/kg   | <b>83.2 cmol/kg</b>     |
